

# Values Based Screening Process

## A LEADER IN VALUES-BASED INVESTING

One of the most popular methods of Values-Based Investing is the Exclusionary Screening strategy, where a fund will screen out companies who are profiting from business that is at odds with a particular set of values. The Steward Funds strategy applies a cultural values screen process designed to be consistent with widely held traditional values. The Funds seek to avoid investing in companies materially involved with pornography, abortion, alcohol, gambling and tobacco.

- The Funds apply strict exclusionary screens to companies involved in the businesses of abortion and pornography.
- The Consulting Team screens businesses that are principally involved in gambling, as well as alcohol and tobacco products.
- We specifically use avoidance screens and do not dilute the portfolio by seeking to invest in companies that promote any individual cultural or social issue.
- This methodology gives the Funds the ability to serve the rapidly growing number of investors seeking competitive investment returns without compromising their personal convictions.

Past performance is no guarantee of future results. Investment return and principal value will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. The Fund's current performance may be lower or higher than quoted. For the Fund's performance as of the most recent month end, please call 888-556-5369. Returns are historical and are calculated by determining the percentage change in the net asset value (NAV) with all income and capital gain distributions reinvested.
